PROFESSIONAL SUMMARY

AI-enthusiast and engineering graduate driven by the curiosity to understand how Machine Learning models and Large Language Models (LLMs) learn, generalize, and reason. Passionate about research-oriented development, including LLM fine-tuning, prompt engineering, and hybrid ML-LLM pipelines. Skilled in Python, data preprocessing, experimentation, and building working prototypes. Always eager to experiment, learn rapidly, and push the boundaries of what AI can achieve.

WORK EXPERIENCE

LLM Intern

PiDot, Balanagar, Hyderabad

September 2025 – December 2025

- Worked on fine-tuning DeepSeek AI by cleaning datasets, formatting training inputs, and setting up model configurations.
- Improved model accuracy on different benchmarks by testing different prompts, adjusting training settings, and evaluating outputs to reduce errors and hallucinations.
- Built training scripts using Python, Hugging Face Transformers, and SFT Trainer on Kaggle and Google Colab.

EDUCATION

Bachelor of Technology(B.Tech) in Computer Science and Engineering(AI&ML)

St. Martin's Engineering College, Dhulapally, Hyderabad

2022-2026

CGPA: 8.91

Intermediate(MPC)

Narayana Junior College, Vittalwadi, Hyderabad

2020-2022

Percentage: 98.1

SSC

English Union High School, Kavadiguda, Hyderabad

CGPA: 10

SKILLS

- Programming Languages:** Python, SQL(Basics)
- ML & AI:** Machine Learning, NLP, LLM Fine-Tuning, Hugging Face
- Cloud & Platforms:** Google Colab, Kaggle
- Soft Skills:** Communication, Teamwork

PROJECTS

- Detection of AI-generated images with CNN and Interpretability using XAI**
Developed a CNN-based deep learning model to classify AI-generated and real images, achieving approximately 91% accuracy on image classification tasks. Integrated Explainable AI (XAI) techniques such as Grad-CAM to visualize model predictions and improve interpretability and transparency of the classification process.
- AI Topic Explainer**
Developed and deployed a full-stack AI-powered web application using Next.js, OpenRouter API, and Vercel to generate simplified, student-friendly explanations for complex technical topics. Implemented prompt engineering, responsive UI design, and API integration to improve accessibility and interactive learning experiences.
- Fraud Detection in Banking Data**
Built a machine learning-based fraud detection system to identify suspicious banking transactions using data preprocessing, feature engineering, and classification algorithms. Performed comparative analysis of multiple ML models with performance evaluation metrics such as accuracy, precision, recall, and F1-score to improve fraud detection reliability.

ACHIEVEMENTS

- Been an active NCC Cadet with NCC 'A', 'B', and 'C' Certificate qualifications, demonstrating leadership, discipline, teamwork, and commitment through regular drills, training, and organizational activities.
- Selected to represent the college at the National EBSB (Ek Bharat Shreshtha Bharat) Camp, participating in national-level cultural exchange, leadership, and collaborative activities.
